Osteoporosis in RS

What is Osteoporosis?

 Osteoporosis is a condition characterized by a decrease in the density of bone, decreasing its strength and resulting in fragile bones.

Symptoms & Signs:

- No symptoms in early stages
- Symptoms occurring late include:
- Bone pain or tenderness
- Fractures with little or no trauma
- Loss of height Low back pain due to fractures of the spinal bones
- Neck pain due to fractures of the spinal bones
- Stooped posture or kyphosis

Osteoporosis - RS Vs. Norm

Treatment

The goals of the treatment:

- Prevent or slow down bone loss/weakening
- Prevent bone fractures
- Control the pain
- Minimize risk of falling

Those goals could be achieved through:

- Physical activity
- Nutrition
- Medication

Physical activity

Weight bearing exercises:

• Walking, Running, Stair climbing, Dancing, standing

Treadmill training

Physical activity

Weight bearing exercises:

Walking, Running, Stair climbing, Dancing

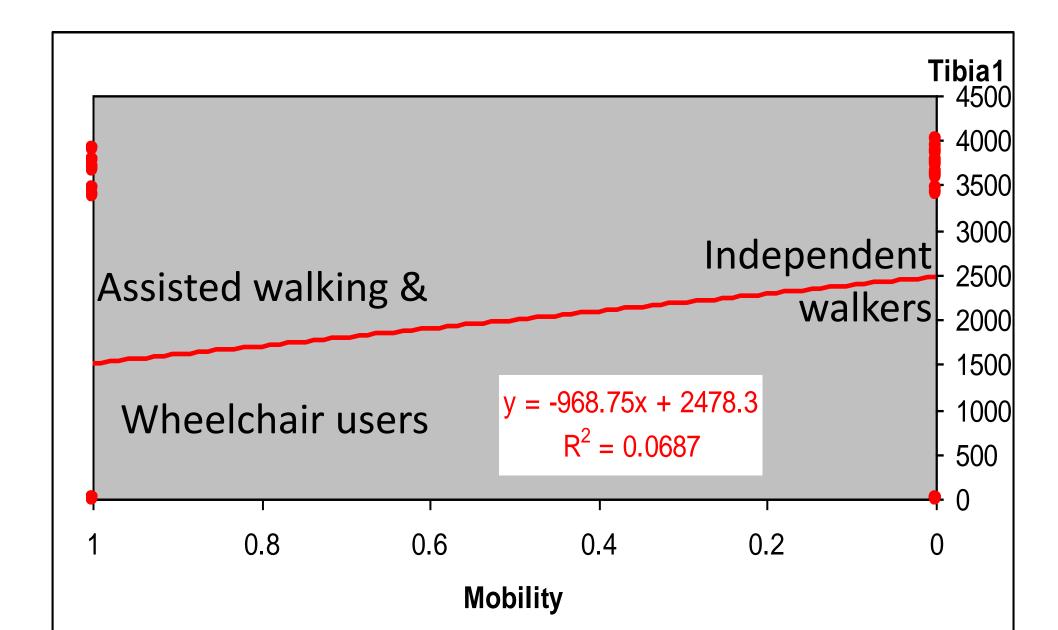

Resistance exercise

Weights, Rowing machines,

Balance exercises

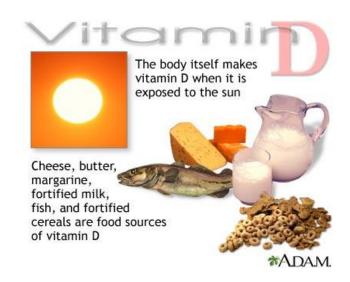

Balance board,

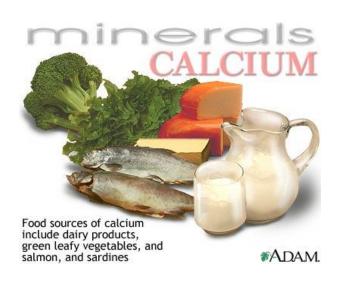

Mobility and bone strength

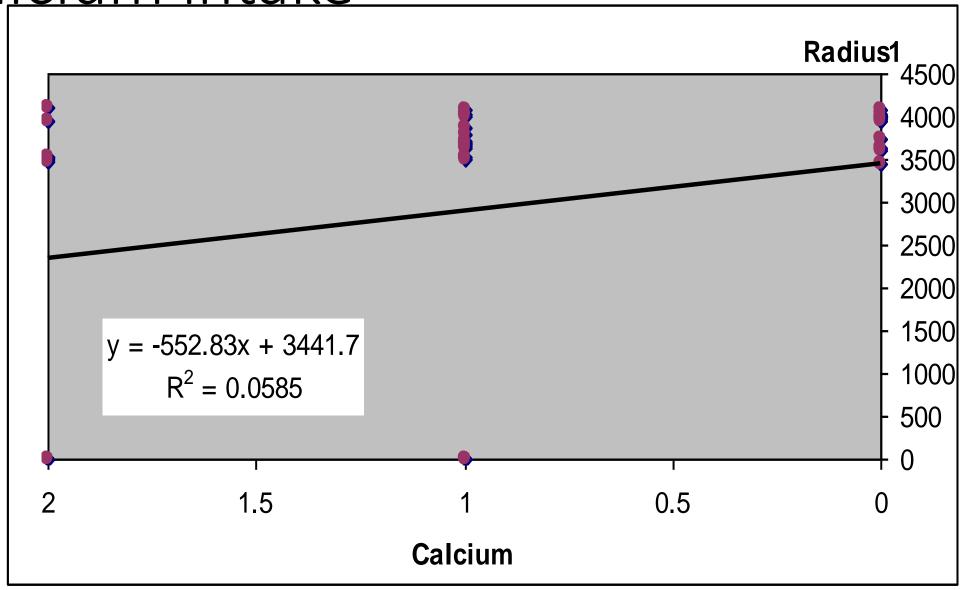

Nutrition

- Get at least 1,200 milligrams per day of calcium and,
- 800 1,000 international units of vitamin
 D3

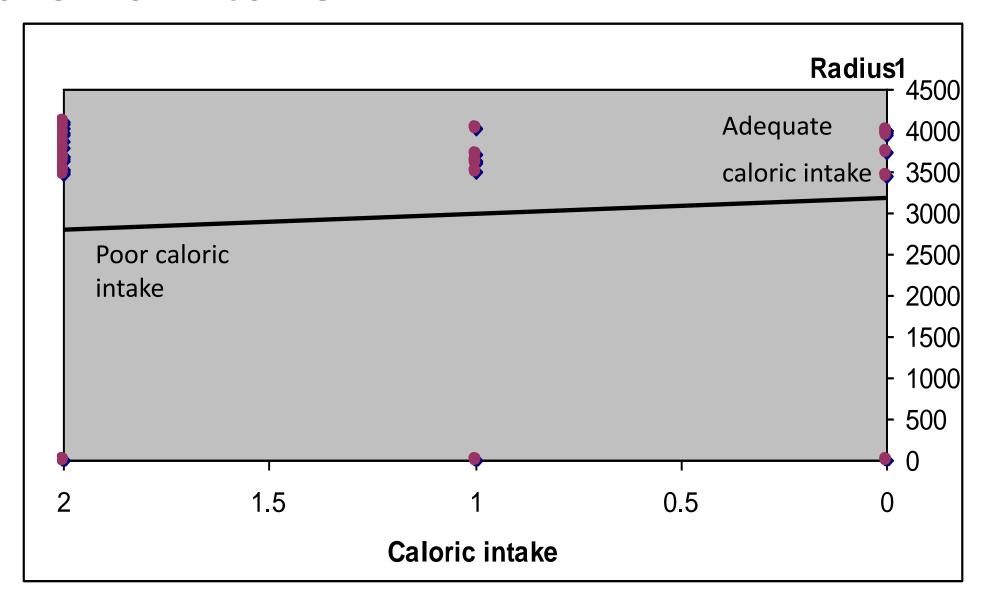

Calcium intake

Caloric intake

A case study – treatment for severe osteoporosis

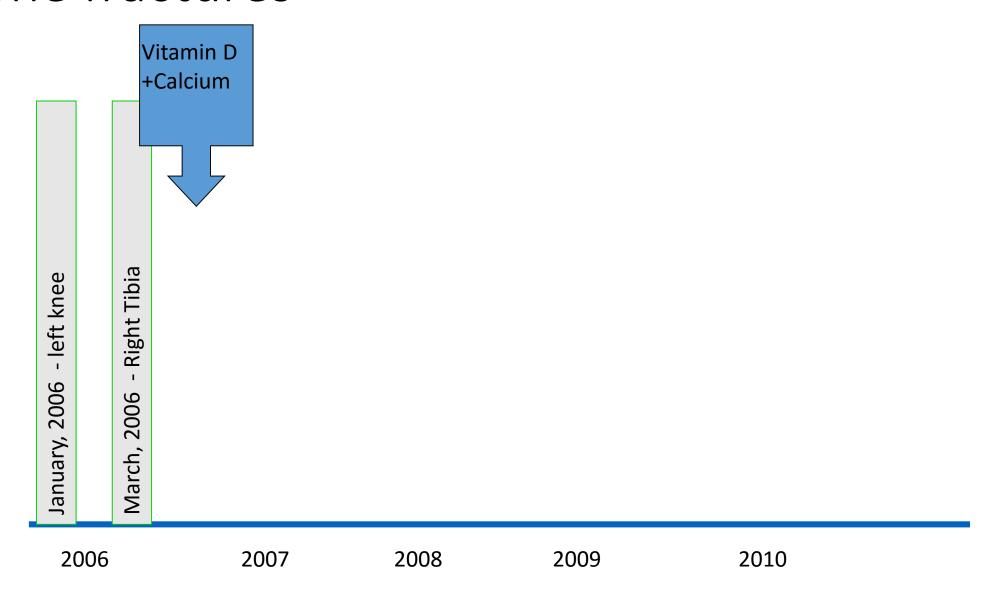

Child's name: M.T.

Date of birth: Jan, 2001

Initial development: normal pregnancy and delivery, no complications

Diagnosis: Rett syndrome (11/2)

Bone fractures

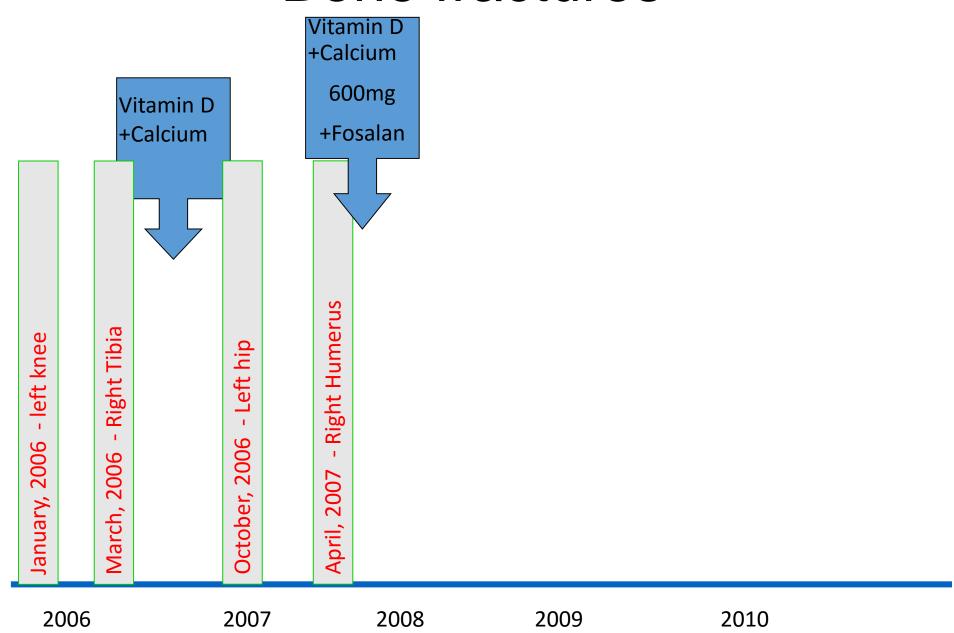

DXA findings August 2006

PR%	Z Score
% of bone density for age 25	SD between measured value and normative values for age
<u>31%</u>	<u>- 3.8*</u>

^{*}Value lower than -2.5 = Osteoporosis

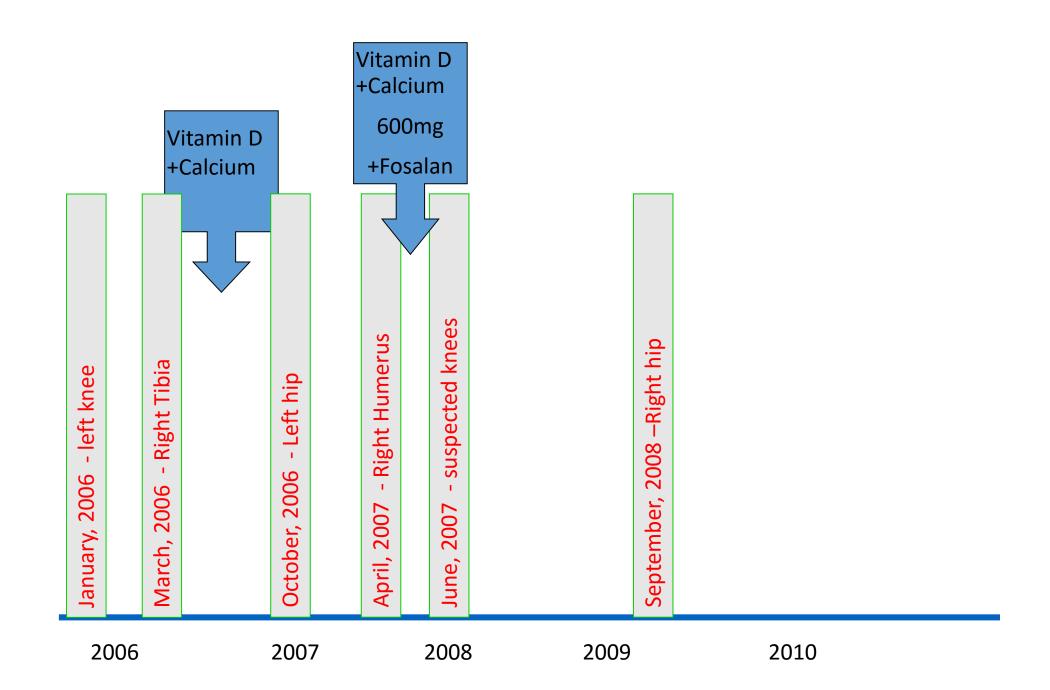

Bone fractures

Fosalan

- Fosalan is part of a family of drugs called bisphosphonates
- It is used to prevent osteoporosis by preventing bone breakdown

Pamidronate (Aredia)

<u>Treatment protocol:</u>

A 30 mg dose is inserted through an Intravenous drip every three month for three days, 4 hours each day.

During each treatment blood pressure and Pulse are measured every hour.

Each day blood is measured for Urea, Calcium, Magnesium, Natrium.

Management Vitamin D Vitamin D +Calcium +Calcium 600mg knees Right Humerus -Right hip **Right Tibia** - left knee Aredia Left hip suspected 2008 2009 2006 2006 2006 September, 2007 2007 December, October, January, March, April, June,

2008

2009

2010

2006

2007

DXA Follow up - 2010

- Mineral density: 0.49 (0.33)
- % of norm for age: 83% (58%)
- Z score: -1.3 (-3.8)
- Comparison with previous findings:+49.5%

Present

March 2010 – normal BMD discontinue Fosalan – No fractures

Future April 2012 – another treatment with Aredia
